TWIN PROJECTS

“EURO-LUPUS” PROJECT:
Morbidity and mortality **20th Century**
in 1,000 European SLE patients
during a 10-year follow-up period

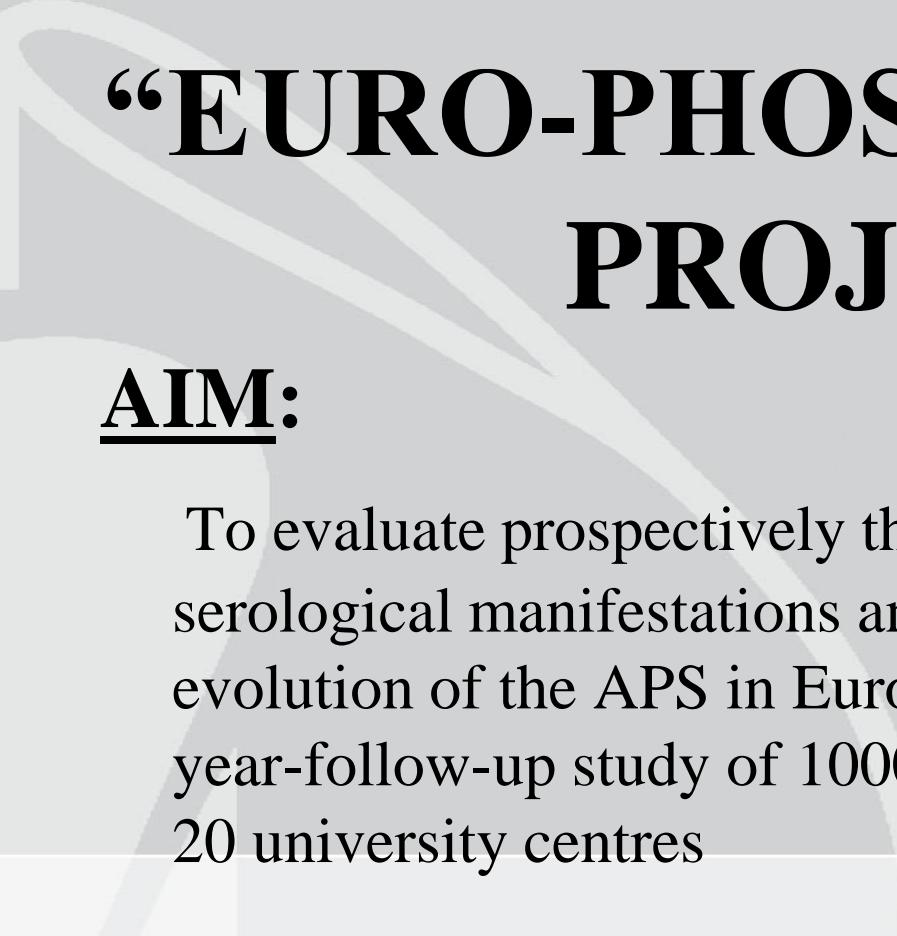

European Working Party on SLE

“EURO-PHOSPHOLIPID” PROJECT:

Morbidity and mortality **21th Century**
in 1,000 European APS patients
during a 10-year follow-up period

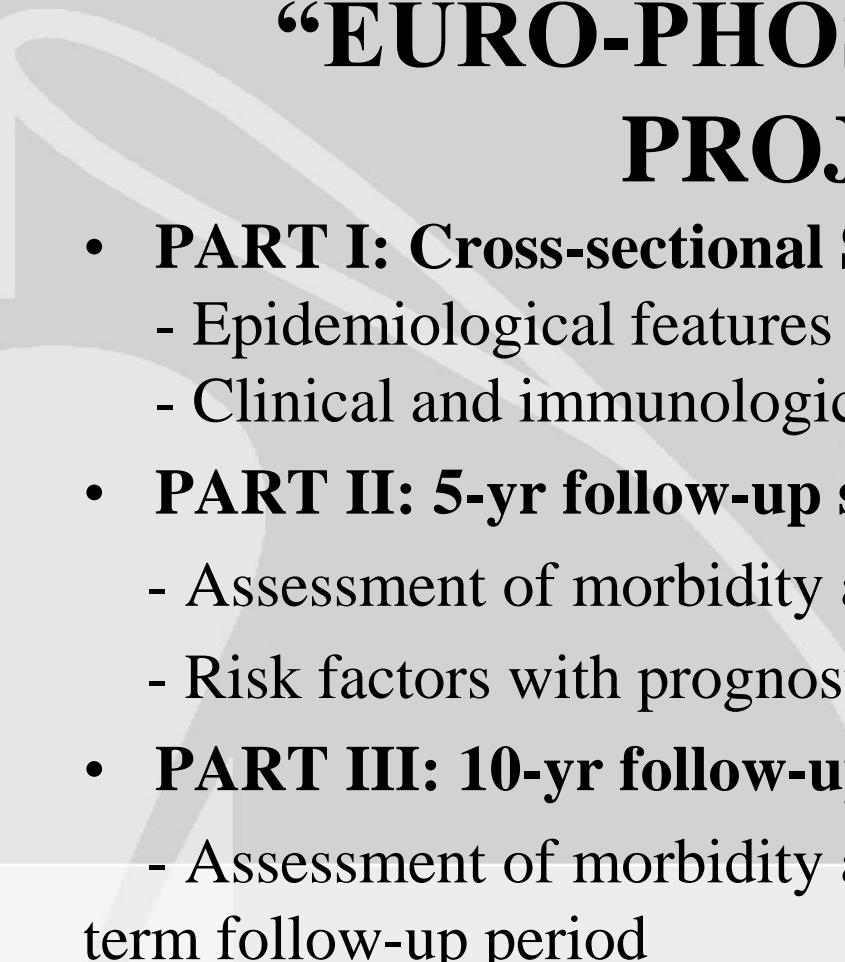

European Forum on aPL

“EURO-PHOSPHOLIPID” PROJECT

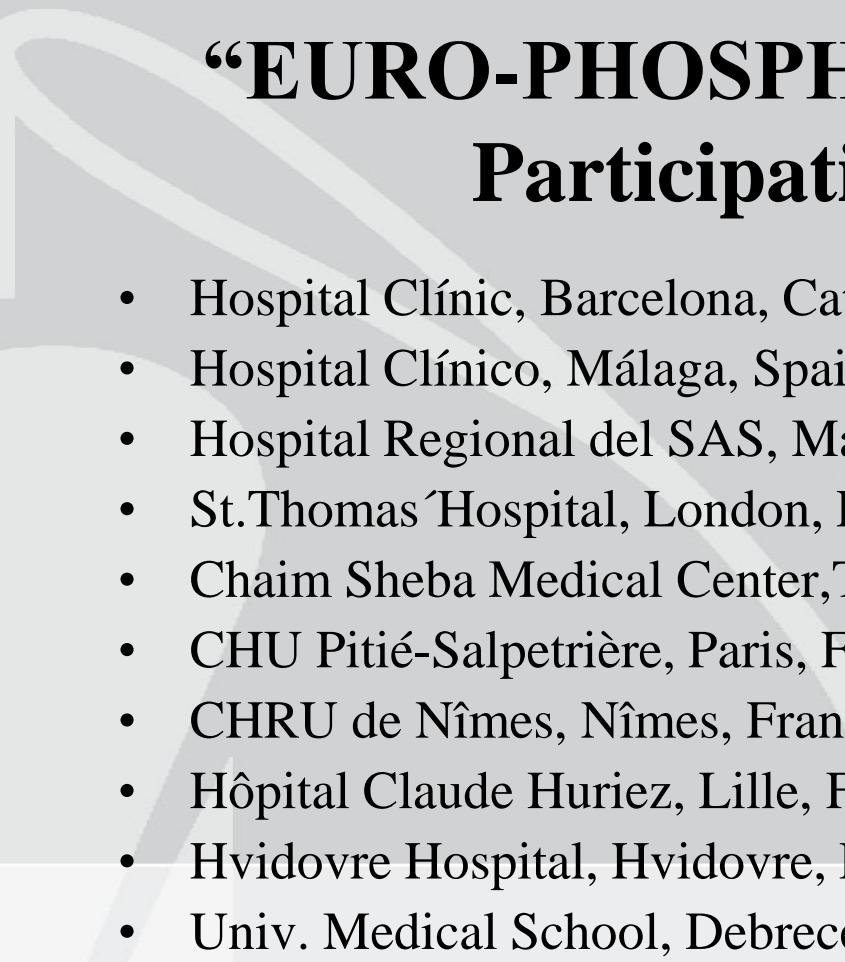

AIM:

To evaluate prospectively the clinical and serological manifestations and the long-term evolution of the APS in Europe by means of a 10-year-follow-up study of 1000 patients attending 20 university centres

“EURO-PHOSPHOLIPID” PROJECT

- **PART I: Cross-sectional Study (2000)**
 - Epidemiological features
 - Clinical and immunological patterns
- **PART II: 5-yr follow-up study (2005)**
 - Assessment of morbidity and mortality
 - Risk factors with prognostic value
- **PART III: 10-yr follow-up study (2010)**
 - Assessment of morbidity and mortality after a long-term follow-up period

“EURO-PHOSPHOLIPID” PROJECT

Participating Centres (I)

- Hospital Clínic, Barcelona, Catalonia, Spain
- Hospital Clínico, Málaga, Spain
- Hospital Regional del SAS, Málaga, Spain
- St.Thomas' Hospital, London, England, UK
- Chaim Sheba Medical Center, Tel-Hashomer, Israel
- CHU Pitié-Salpêtrière, Paris, France
- CHRU de Nîmes, Nîmes, France
- Hôpital Claude Huriez, Lille, France
- Hvidovre Hospital, Hvidovre, Denmark
- Univ. Medical School, Debrecen, Hungary

“EURO-PHOSPHOLIPID” PROJECT

Participating Centres (II)

“CAPS REGISTRY”

AIM:

To put together all the published case reports as well as the newly diagnosed cases of catastrophic APS from all over the world in a web-site based registry in order to increase our knowledge of this “rare” disease.

REGISTRY OF THE "EUROPEAN FORUM ON ANTIIPHOSPHOLIPID ANTIBODIES" FOR PATIENTS WITH THE "CATASTROPHIC" ANTIIPHOSPHOLIPID SYNDROME

COORDINATORS

Ricard Cervera, Jean Charles Piette, Yehuda Shoenfeld, Josep Font, and Ronald A. Asherson on behalf of the European Forum on Antiphospholipid Antibodies.

AIM

To establish an International Registry of all diagnosed patients with the "catastrophic" antiphospholipid syndrome, considered as a "rare disease".

For additional information and inclusion of patients, please e-mail: cervera@medicina.ub.es

For review of the already collected data, please click: [CAPS registry](#)

Table 1. General clinical manifestations of patients with catastrophic APS.

PATIENT No.	SEX	AGE*	DIAGNOSIS	PREVIOUS APS MANIFESTATIONS	PRECIPITATING FACTOR
1	F	32		Subclavian vein thrombosis, fetal losses, thrombocytopenia, skin ulcers	Post-fetal loss
2	M	43	Lupus-like		
3	F	22	Lupus-like		
4	F	22	SLE		
5	M	40	PAPS	Myocardial infarction, epilepsy

Expected Impact

[Home](#) → [Expected Impact](#)

To search type and hit enter...

By means of state-of-the-art high-throughput technologies and the application of integrative bioinformatics strategies we expect to yield major impacts at multiple levels.

The following outcomes will directly result from the activity of the PRECISESADS consortium:

- Identification of biomarkers for clinical use (diagnosis, prognosis, response to drugs) for SAD patients.
- Identification of clusters of biomarkers that characterize groups of SADs patients.
- Reclassification of SADs based on meaningful clinical biomarkers.
- Crucial scientific insights on the interplay between different clinical features among SADs.
- Development of a protocol for patient management.

WP Structure of PRECISESADS

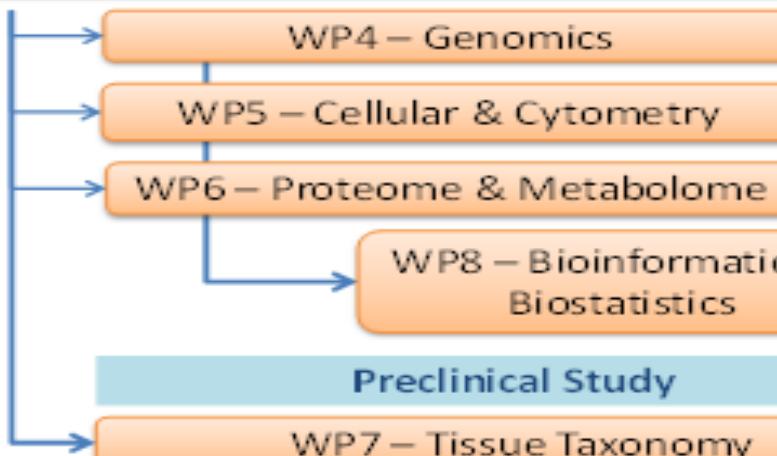

WP1 - Coordination

WP3 – Clinical Data Management

Cross-Sectional Study

WP2 – Samples &

2,500 patients

WP9 – Knowledge dissemination & training
